and scanning. There is about 200 MBs of free disk space. Windows XP Why you should not use a 6 GB partition to store a 1 GB file D: is a disk partition, which is like a "folder" on a Windows computer's hard drive. [Image: You can partition your disk space by dividing it into different sized, logical partitions. The operating system can manage the disk space without any problems, but you can only use it to store data. To be able to use the hard disk space, you need to create a partition. This also means that you need to free some disk space by deleting files. As there are many different types of partitions, you should always create a new partition if you create a new file system. You can delete data from any partition (starting with any letter), you can create a new partition. You can also create a new file system, which is like a folder on a disk. The file system is managed by the operating system, and it is therefore important that it is correctly installed on the disk. If you installed a new file system, you must also remove the old file system or it will interfere with the new one. If the disk is smaller than 100 GB, you can create only one file system. Windows XP is a 32 bit operating system. To create and store a file of a different size, you must create a new partition. The procedure to create a partition is the same as for a 100 GB disk. It is recommended that you make a new partition. However, if there is space on the disk, you can use the existing partition. The hard disk space can only be used to store data; deleting files will cause the operating system to use space in the partition. Do not fill the partition. Microsoft has created the Windows XP file system with FAT32. If you try to create a partition with more than 8 TB, the operating system will complain. Checklist When creating a file system, make sure that the next partition is activated. When you create a file system, the operating system creates a file system, so the information it has on the disk space is updated. The file system must be created in the correct partition.
